INTERNATIONAL CONFERENCE ON MENTAL HEALTH CARE

"Mental Health: Global challenges of XXI century"

The problem of Mental Health Care in the contemporary world becomes global with many negative consequences. Thus, according to the World Health Organization, mental and behavioral disorders are extremely common and affect

up to 25% of all people in certain periods of their lives. The WHO notes that in the future, given the aging population and worsening social problems, the number of cases of this category will increase considerably.

Each country in the world faces significant hindrances in both socio-psychological and economic aspects of the Mental Health Care system. No country has yet completely solved this problem in full. This create an urgent need in joint efforts to solve this problem.

The conference aims to:

- attract attention of world researchers to problems of MHC in developing countries and to global MHC problems
- investigate perspectives and solutions of specific issues of MHC in multidisciplinary and multicultural aspects. To facilitate pooling researches to effectively solve global MHC problems
